NOVEDADES 2026

NEBULA

Nebula es un programa diseñado para adaptarse a cualquier espacio creando las formas y medidas que se deseen. Se compone de 2 tipos de mallas metálicas, horizontal y vertical, que se pueden combinar de infinitas maneras aportando magia a cualquier espacio. Se puede combinar en colores a medida y elegir la fuente de luz que se desee.

Nebula is a program designed to adapt to any space, creating the desired shapes and sizes. It consists of two types of metal mesh, horizontal and vertical, which can be combined in countless ways, adding a touch of magic to any space. Custom colors and a choice of light source are available.

Version horizontal ajustable en altura gracias a sus 2 tensores

ORION

Orion es un programa de diseño ideado para adaptarse a cualquier espacio, sin importar el tamaño y la forma. Se trata de un diseño escultural que se puede crear en innumerables formas. Realizado en tela de acero, aporta al espacio un sinfín de juegos de luces y sombras, un acento verdaderamente diferenciador. El tipo de iluminación, no incluido, se diseña a medida para cada proyecto.

Orion is a design program conceived to adapt to any space, regardless of size and shape. It is a sculptural design that can be created in countless forms. Made of steel mesh, it brings to the space a myriad interplay of light and shadow, a truly distinctive accent. The type of lighting, not included, is custom-designed for each project.

LAGRIMA

La colección Lagrima se inspira en la belleza de la combinación del cristal y el latón con una fuente de luz que recorre verticalmente su forma aportando alma al diseño. Elige entre cristal fumé gris o transparente con esfera de latón o todo el cuerpo de cristal.

The Lagrima collection is inspired by the beauty of combining glass and brass, with a light source running vertically through its form, giving the design its soul. Choose between smoked gray or clear glass with a brass sphere, or a completely glass body.

SADA

Sada esta inspirada en la luz filtrada a través de una grieta. Su potente fuente de iluminación nos permite recibir la luz a través de la apertura perimetral del difusor. Sada nos ofrece una luz indirecta, pura y de gran confort.

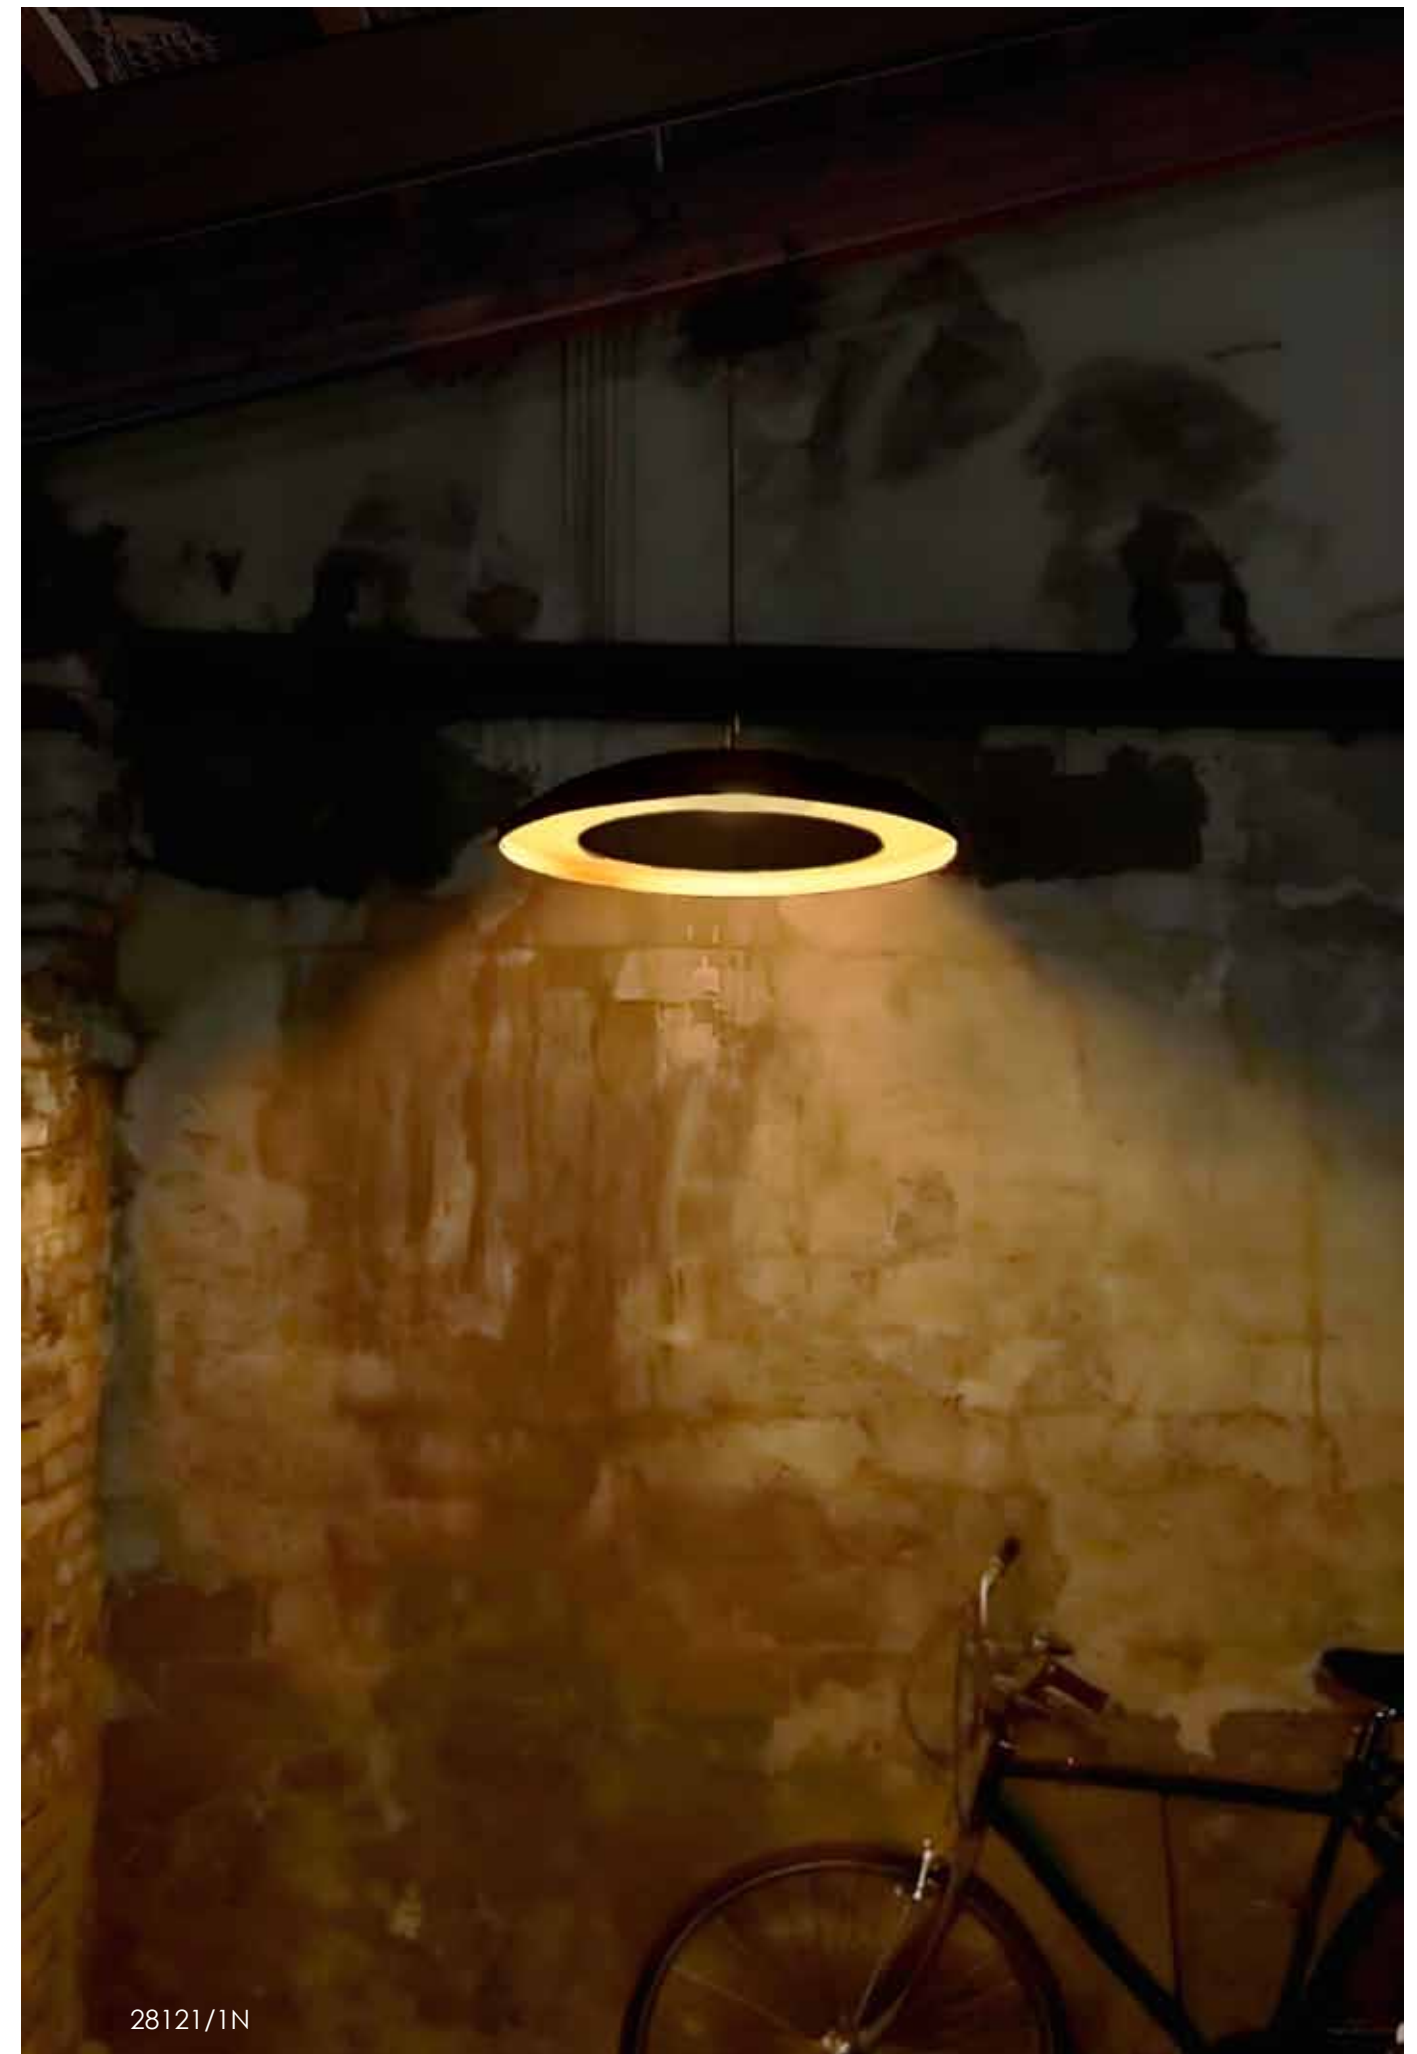

Sada is inspired by light filtering through a crack. Its powerful light source allows us to receive light through the diffuser's perimeter opening. Sada offers us a pure, indirect, and highly comfortable light.

EPHELIA

El desarrollo de curvas irregulares y pronunciadas, con un LED oculto en su marco de acero, subliman el efecto Moaré de la malla de acero rígido de Ephelia. Un mágico recorrido de curvas y luz que ofrece un sugerente confort visual.

The development of irregular and pronounced curves, with an LED concealed within its steel frame, enhances the Moiré effect of Ephelia's rigid steel mesh. A magical journey of curves and light that offers a captivating visual comfort.

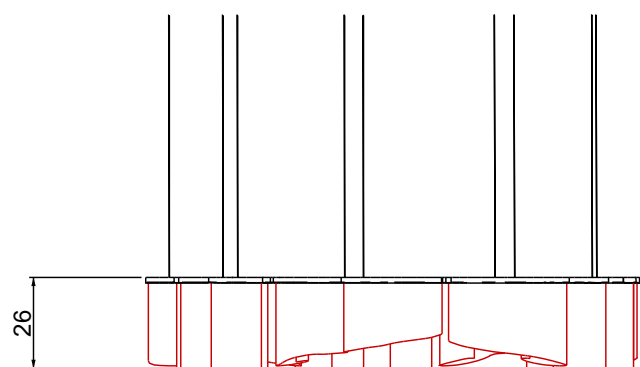

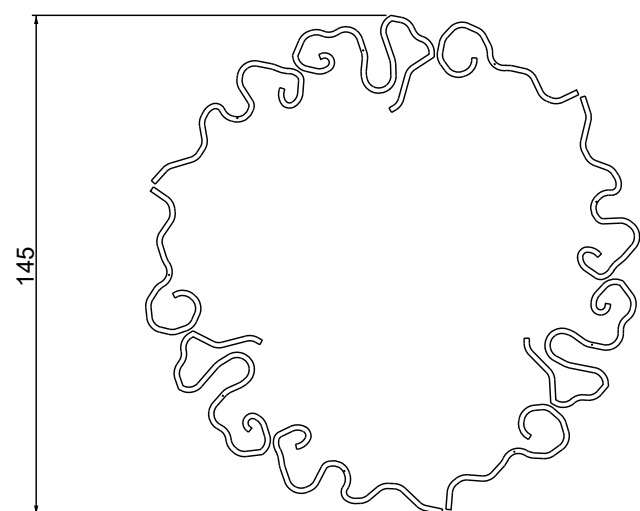

The image shows the interior of a sophisticated restaurant. In the foreground, there are round tables with dark grey or black tablecloths, each set with a gold-rimmed plate, a black napkin, and several glasses. A long, plush red velvet sofa runs along the side of the room. In the background, a curved bar is visible, with shelves above it filled with various bottles of liquor. The ceiling is dark with exposed metal beams and a series of long, rectangular light fixtures that resemble draped fabric. The overall atmosphere is warm and elegant, with a focus on high-quality materials and lighting.

CLEVELAND CAVALIERS NBA PRIVATE MEMBER'S CLUB

Ephelia luce en el centro del restaurante VIP del Rocket Arena siendo la protagonista principal de este ambiente elegante y sofisticado.

Ephelia takes center stage in the Rocket Arena's VIP restaurant, becoming the main attraction in this elegant and sophisticated setting.
